CONSULTANT IN
AERONAUTICAL TRAINING

Professional Qualifications

Currently, consultant in aeronautical training for the IFAERO CCI (Insitut de Formation Aéronautique de la Chambre de Commerce et d'Industrie Nice Cote d'Azur, www.ifaero.com) [Institute of Aeronautical Instruction for the Chamber of Commerce on the French Riviera].

My job consists of defining, proposing, and developing the instructional activities (initial and continuing education) tied to the aviation world for students, people looking for a first job or looking to retrain, as well as people already employed by an aviation company (flying or ground crew) and who desire or are obliged to follow training courses specific to their job.

Another part of my job consists of studying new aeronautical training projects for IFAERO CCI, such as the study of the establishment of a new aeronautical training center based in the southern Provence-Alps-French Riviera region at the Cannes-Mandelieu (06) airport. The purpose of this center will be to respond to the professional training needs, both initial and continuing, of the businesses located in the south of France, and the rest of the world.

Before joining the team at IFAERO CCI in November 2002, training as a professional diver, licensed deep-sea diving instructor , MF1 and BEES1 as well as diver CII, allowed me to exercise during 11 years, in France and abroad, a profession allying human and technological adventures in all forms.

Strangely enough, whereas my heart and spirit have always been linked to the stars, I had to take the path of the ocean world, living close to unique underwater adventures, in order to find the path of the aerial world by the way of a career in aeronautical training. And so finally I can present myself to you thanks to **"The Phenix Project"** and to reveal my true nature, my true personality, the one which has always been there and which today more than ever needs to be expressed by implementing my lifelong project, **The Phenix Project**.

Professional Experience :

2004/2006

Advisor in aeronautical instruction, responsible for training courses: IFAERO CCI (Institut de Formation Aéronautique de la Chambre de Commerce et d'Industrie Nice Côte d'Azur, www.ifaero.com) [Institute of Aeronautical Training for the Chamber of Commerce on the French Riviera] In the areas of : studies, development, and commercialization of aeronautical training products.
